SEAL ON EACH SOLE.

"Am I using Red Cross Christmas Seals?" reiterated a good natured old cobbler as he looked up from the shoe he was repairing to the person who stood blocking the doorway of the little shop and who had asked the question originally. "I don't know of them. What are they for?" he asked.

When told that the little stickers were being sold all over the United States to raise money to prevent tuberculosis the cobbler became very much interested.

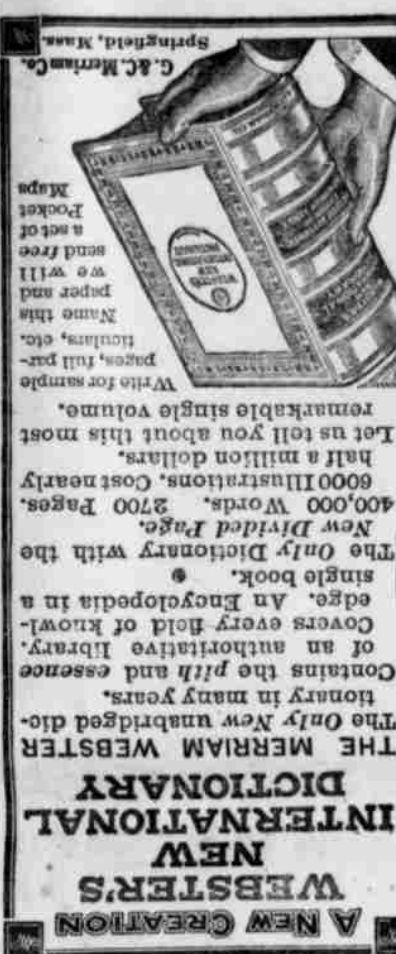

"Now, I call that a good cause," he drawled. "I don't write any letters, and I don't send any Christmas packages. There's just me and the old woman left. I can't use my seals that way, but I'll tell you how I can use them. I will stick a seal on the sole of every shoe I tap."

Matches.

"Lucifer" matches (so called from the sulphur with which they were tipped) came into use about the year 1835. Since then matches have been greatly improved, though, of course, the main principle remains the same. About 1845 Schrotter of Vienna, produced his "amorphous phosphorus," which was the beginning of the inventions that have resulted in the very pleasant and almost perfect match now in use.
